EDUCATION

University of Toronto
Honours Bachelor of Science
Mathematics Specialist and Computer Science Major

July 2024

EXPERIENCE

Math and Statistics Teacher
Deran Academy

Sep. 2024 – Current

- Planned and taught courses in AP calculus and statistics ensuring alignment with college board requirements
- Designed and delivered lesson plans incorporating both theory with application to boost student understanding

Competitive Math and Programming Coach (C++, Python, Java)
LinkedKey

July. 2024 – Current

- Designed and authored tailored training materials maximizing topic insights and contest placements for students
- Provided targeted knowledge and mentorship, leading to numerous top scores in regional and national contests

Backend Developer (TensorFlow, Pandas, GCP, Azure, scikit-learn)
Arima

Feb. 2024 – Apr. 2024

- Researched and developed improvements to core synthetic population generation and marketing algorithms
- Implemented GCP and AWS APIs to automate deployment of TensorFlow written machine learning models

Frontend Developer (React, Firebase, Tailwind)
BalanceAI

Jan. 2024 – May 2024

- Created new dashboard streamlining account and classroom admin experience for both students and teachers
- Improved website accessibility by implementing WCAG guidelines with WAI-ARIA and react specific tools

PROJECTS

1to1 Schedule Manager (Python, Django, AWS, React, Tailwind | Fullstack)
Cloud Based Scheduling Tool

- Developed a web app with a React frontend, enabling users to manage large meetings, deployed on AWS.
- Created RESTful API endpoints in Django to connect the frontend with a PostgreSQL database.
- Implemented a machine learning model to optimize suggested meeting times based on user feedback.

Deep Learning Improvements in Medical Imaging (PyTorch, Numpy | Research)
Machine Learning Research Paper

- Trained and verified various CNN models on the diagnosis of eye diseases to find the best base models
- Novel application of ensemble methods had a 3% improvement during test compared against benchmarks

SKILLS

Programming Languages	C, C++, Python, Java, PostgreSQL, Golang, HTML, CSS, JavaScript
Technologies	React, PyTorch, Django, Tailwind, Expo, Hugo, LaTeX
Build / DevOps Tools	Git, make, Docker, Firebase, Azure, GCP, AWS, PowerShell, Bash, Linux
Achievements	2023 Putnam Math Contest Top 1000
